VICTOR DANIEL ORTIZ GARCIA

Jr. Software Engineer | Full-stack Developer

victororortiz.vg@hotmail.com | +52 221 112 4385 | LinkedIn | GitHub | Puebla, México

Software Engineer with experience across the web application development lifecycle, RESTful API design, and relational database management. Specialized in Full-stack architecture, workflow automation, and data optimization in corporate and international collaborative environments. Proven ability to deliver scalable, efficient, and results-oriented solutions.

WORK EXPERIENCE

Full-Stack Developer (Freelance) **Médicos Sin Fronteras (MSF)** **August 2025 – April 2026**

- Led the full-cycle development of a web platform for donation management and corporate partnerships.
- Designed and implemented a RESTful API with over 150 endpoints, ensuring high security, scalability, and robust data authentication.
- Developed dynamic, responsive user interfaces focused on User Experience (UX).
- Automated administrative workflows, significantly reducing manual workload for the finance team.

`Technologies: JavaScript • REST APIs • MySQL • Bootstrap • HTML5 & CSS3 • Git`

Software Development Intern **T-Systems México** **January 2024 – April 2024**

- Developed optimized PL/SQL scripts for operational data extraction, transformation, and structuring for fleet maintenance reporting (VW Project).
- Automated ticket file processing and service tracking for corporate fleet users.
- Identified and resolved data inconsistencies across corporate database environments.
- Documented key technical processes following automotive industry quality standards.

`Technologies: PL/SQL • SQL • Visual Studio Code`

Software Developer (Internship) **Mulliert S.A. de C.V.** **May 2022 – August 2022**

- Designed and built a warehouse management and inventory control system from scratch.
- Implemented automated generation of executive PDF reports and material requisitions.
- Designed and optimized relational database schemas to ensure high-performance queries.

`Technologies: C# • .NET Framework • MS SQL Server • PDF Generation • Visual Studio`
